

Affiliated Ear, Nose & Throat Physicians

Consent for Diagnostic Tests/Procedures

Affiliated Ear, Nose & Throat Physicians is pleased you have chosen us for your care. Our physicians feel that a patient presenting to our office with sinus, allergy, throat or hearing complaints require a thorough examination of that specific area. In some cases, this can only be accomplished by diagnostic tests or procedures, which your physicians may feel are medically necessary. The tests or procedures are separate from the physician's office consultation and thus have a separate charge. Insurance companies may consider the nasal endoscopy or laryngoscopy a "surgical procedure." Any of these tests or procedures may be applied to your deductible and/or co-insurance based on your insurance plan benefits.

**For informational purposes only. Document will be signed at scheduled appointment.
